MINIMAX™ 16E W

track mounted wallwasher

MiniMax 16E W is a wallwasher designed for use with a 120-volt, GU10 base, 7.5 watt Sora MR16-GU10 flood lamps, supplied by others.

- Fixture may be powered by one of eighteen 20-amp 120-volt track systems.
- The optical assembly consists of a hammered aluminum reflector and a 40° x 70° spread lens. In addition, the assembly can accept one of a number of optional [Optical Accessories](#) including color filters and screens. Assembly is keyed relative to luminaire housing, to retain critical lens orientation.
- A concealed swivel provides 385° horizontal rotation and vertical adjustment from 0° to 90°. The swivel is permanently tensioned, allowing the fixture to remain fixed at any aiming angle. Fixture can be fully locked in place, in both vertical and horizontal planes, simply by depressing a hinged ('lever lock') bar so that it lies flush with the top of the fixture. Locked in this way, fixture will maintain focus even when manipulated for re-lamping. Lifting the lever lock frees the swivel and allows re-aiming.
- MiniMax fixtures have seamless aluminum housings for lightweight durability and cast aluminum tops for heat dissipation. Standard finish is matte white; also available in black and Industrial Silver matte paint finishes.
- For more information, [click here](#).
