APlus

RECESSED DOWNLIGHT/WALLWASHER

Edison Price Lighting has proudly operated a **MADE IN USA** factory since 1952.

Our factory begins with high-quality, heavy-gauge steel and aluminum. We use both computerized and handiwork techniques to manufacture almost every part, down to the smallest spring.

Long lasting metals ensure durability, guaranteeing that APlus is built to last.

APlus

RECESSED DOWNLIGHT/WALLWASHER

Illuminate an entire room, wall, corner, or hallway with Edison Price Lighting's innovative APlus family

www.epl.com

APlus

APlus masters a room's most challenging angles, thanks to its unique hemispherical LED and precise reflectors. The four interchangeable reflectors provide either downlighting (DL), wallwashing (WL), double wallwashing for hallways (DWW), or corner wallwashing (CWW).

APlus is comfortably glare-free, thanks to the reflector's proprietary design and anodized aluminum construction. Fixtures are available in 4", 5" or 6" apertures with an optional seamless flush trim.

APlus accepts a recommended retrofit A19 LED lamp, which combines the efficacy of an LED with the easy on-site serviceability of a screw-in lamp. APlus' use of a retrofit LED lamp also improves affordability, without sacrificing optical performance.

APlus is available in many versions: standard recessed (APlus); install-from-below (Presto and Prestina APlus); IC-rated (EPIC APlus); surface (APlus SM); and pendant mounted (APlus PM).
